Technical Skills

Languages: Python, Javascript, HTML/CSS, SQL, C++, Swift

Frameworks: Next.js, Node.js, Express.js, Tailwind CSS, SwiftUI, Django

Tools and Technologies: Git/GitHub/GitHub Pages, VS Code, Apache Airflow, Xcode, MySQL

Experiences

Metropolitan Transportation Authority - New York, NY

Jan 2025 - Present

Data Engineering Intern

- Engineer and maintain scalable database systems and ETL pipelines, utilizing technologies such as MySQL, PostgreSQL, Spark, AWS, and Azure to streamline data processing and enhance performance.
- Design and deploy interactive dashboards using React.js and Angular.js, delivering actionable insights for infrastructure planning and decision-making.
- Strengthen data governance and security protocols by implementing classification models and data masking strategies to ensure compliance and integrity.

PENCIL Inc. - Origen Consulting - Remote

Jul 2024 - Aug 2024

Web Development Intern

- Developed a Next.js wiki and market web app deployed on Vercel, delivering a user-friendly platform for the spread of environmental awareness, knowledge, and eco-friendly products.
- Leveraged Tailwind CSS for styling, Prisma ORM for database management, and Firebase Authentication for user management by implementing over 20 wireframes for a functional UX and visually appealing UI.

Break Through Tech - Bitly - Remote

Jan 2023

Software Engineer Intern

- Produced and launched a React web app for user creation of personalized events and RSVPs with the execution of API requests to retrieve and post data from a MySQL database.
- Designed and structured the web app's homepage for smoother UI with Figma and integrated continuous routing between front-end pages to provide an intuitive user experience.

Break Through Tech - Accenture - Hybrid - New York, NY

Aug 2022 - Dec 2022

Machine Learning Engineer Intern

- Performed sentiment analysis on over 80,000 tweets related to recent Apple and Samsung product releases by employing natural language processing techniques to analyze public sentiment for business insights.
- Extracted real-time tweets from X's API over a week to construct an accurate unsupervised learning sentiment model utilizing Dataiku.

Projects

Jeopardy With Friends! - Multiplayer Jeopardy Game (<https://github.com/csci-499-fa24/Team2>)

- Implemented a real-time Next.js app with a team of 6 members enabling users to play “Jeopardy” through Socket.io to handle private rooms, interactive game boards, and synchronized gameplay.
- Created user authentication with Firebase auth and Firestore and real-time waiting rooms.
- Optimized a responsive client-side UI and maintained Jest tests to improve code reliability.

Education

Hunter College - New York, NY

Dec 2024

Bachelor of Arts in Computer Science and Minor in Math and Japanese Language

- Honors: Daedalus Scholars Program, Dean's List (2022-2024) (GPA: 3.85/4.00)
- Relevant Coursework: Practical Web Dev, Database Management, iOS Dev, Digital Product Dev
